PROFESSIONAL SUMMARY

I've spent 15 years designing products people pay for, come back to, and tell their friends about. I'm a 2x co-founder (both acquired), a hands-on senior IC, and have years of experience as a strategic design leader. Most recently at BILL, leading design on AI-native features for a platform where 8 million SMBs get paid.

I'm the kind of designer who can run the research, write the copy, ship the UI, and build the team that does it all at scale. Quality- and customer-obsessed, but practically so — I know when to push for craft and when the business needs a decision. Both ends of that spectrum taught me the same thing: good design isn't decoration. It's what makes someone pay, stay, and come back.

PROFESSIONAL EXPERIENCE

BILL

Sr. Lead Product Designer | October 2025 - Present | Remote

Returned to hands-on IC design role to own end-to-end product experiences for Network & AR teams. Lead design strategy while executing day-to-day: prototyping, user testing, cross-functional collaboration, and shipping. Focus areas include simplifying payment workflows, leveraging AI to accelerate design craft, and building trust through transparency in complex financial systems. Selected as an IC on the Design Leadership team, helping define and improve overall product quality and design standards and contribute to Vision sprints.

Returned to hands-on IC design by choice after serving as Director of Product Design. Over the past year, as the sole designer, I've owned end-to-end design for these significant initiatives on BILL's Network & AR teams:

Payment Links (0-to-1 Launch)

- Led end-to-end design for new lightweight payment feature enabling instant collection without invoice creation
- Navigated complex stakeholder alignment: Payments, Engineering, Compliance/Infosec/Legal, Marketing
- **Impact:** Drove engaged organization adoption and TPV growth; expanded BILL's footprint beyond traditional invoicing and enabled new use cases: donations, commissions, ad-hoc settlements for non-profits and service businesses

AR Modernization

- Full modernization of the AR product — bringing a multi-year-old product surface up to BILL's current design standard while improving usability throughout. Single squad shipped 60 screens.

AI-native AR

- Rethinking how small business owners can manage their most manually intensive workflows to get paid, agentially
- Lead user testing with prototypes to assess the legibility of AI-driven outcomes for non-technical users and foster trust and transparency in agent decision-making.

Cross-Functional AI Acceleration

- Explore beta access to AI-driven prototyping tools (Figma Make, Claude Design, Claude Code) and regularly share learnings to cross-functional teams during office hours
- Built workflows (Glean) to surface and cluster customer feedback for product prioritization
- Created future-vision videos (using LLMs + Midjourney + Runway) that convinced CTO to greenlight team for BILL's first gen-AI feature (automated AR reminders)
- Use NotebookLM for rapid research synthesis; attended conferences and earned certifications in agentic AI

Director of Product Design | Jul 2024 - July 2025 | Remote

Leading strategic vision for user-centered design across product teams at 2,500-person fintech company serving millions of SMB customers.

Key Accomplishments:

- Led team to achieve all-time highs in engaged units, invoices created/sent, and TPV
- Led cross-org innovation sprint (14 designers) to ship ideas (reimagined onboarding) within weeks
- Established quality rubric and review process; broadened adoption across teams to raise design consistency
- Invested in team development: expanded access to remote design conferences, design psychology training, senior IC leadership development

Senior Manager, Product Design | Mar 2021 - Jul 2024

Managed multiple product designers across Growth, Network, and Accounts Receivable post-Invoice2go acquisition.

INVOICE2GO (Acquired by BILL, 2021)

Senior Product Designer / Design Manager | Mar 2021 - May 2022 | Remote

Led design for online workflows team, integrating acquired startups into Invoice2go platform for SMB/Freelancers. Designed features to increase users' online presence and win more work. Mentored designers and contributed to design leadership team.

BOOKLAUNCH.IO & BETTERLANCE.CO (Both acquired by Invoice2go, 2021)

Co-founder / Head of Design | Apr 2013 - Mar 2021 | Rocklin, CA

Booklaunch.io — Built easiest way for non-technical authors to create online book sales pages

Betterlance.co — Simplified CRM and lead management for freelancers to grow their businesses

- Led all design, brand, and product development from concept to acquisition
 - Conducted customer research, built MVPs, iterated based on user feedback
 - Grew both products to acquisition through strategic partnerships with user communities
-

SBM MANAGEMENT SERVICES, LP

Strategic Design Director / Marketing Manager | Jul 2015 - Nov 2016 | Greater Sacramento

Led creative team of 10-15 UX/UI/Visual designers and writers for enterprise performance management software suite.

- Redesigned app infrastructure and major personnel/training library modules
 - Led proposal and presentation design for Fortune 50 clientele
 - Assembled and led cross-department organizational rebranding workshop series
-

BAMBOO CREATIVE / BOOKLAUNCH / SNIPPET

Head of Design, Art Director | Feb 2012 - Jul 2015 | Greater Sacramento

Art direction and design for rapidly growing creative firm. Owned creative for city branding, print, editorial, interactive, and mobile projects. Developed Snippet (short-format publishing platform on iOS and web) and early Booklaunch concepts.

SKILLS & EXPERTISE

Product Design: End-to-end UX/UI, interaction design, prototyping, user research, visual design, design systems

Tools: Figma, prototyping tools, AI workflow and creative-gen (n8n, NotebookLM, Midjourney, Runway, LLMs)

Domain Expertise: Fintech, payments, invoicing, AR/AP, SaaS, B2B, SMB/consumer products

Cross-Functional Leadership: Product, Engineering, Marketing, Sales, CX, Compliance, Legal, Infosec

Specialties: Simplifying complex financial systems, regulatory/compliance navigation, 0-to-1 product launches

WHAT OTHERS SAY

[Ben is] such an incredible leader, designer, and co-worker. I've learned a lot from [him] in how to lead meetings and conduct yourself. Thanks for being a great example of excellence. — Software Engineer, Invoice2go & BILL

His business acumen, understanding of our products, understanding of the market and the knowledge of design concepts adds tremendous value to the leadership team as well as the broader AR team. — Engineering Manager, BILL AR
